DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-14, drawn to a method for production of plant storage lipids by providing an enzyme having phospholipids:diacylglycerol acyltransferase.

Group II, claim(s) 15-20, drawn to a method of increasing phospholipids:diacylglycerol acyltransferase activity of a plant.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention of Group I relates to providing a mixture of enzymes including phospholipids:diacylglycerol acyltransferase to produce polyunsaturated fatty acids in a plant, while the invention of Group II relates to increasing phospholipids:diacylglycerol acyltransferase activity in a plant by modifying gene expression in the plant. The inventions of Groups I and II lack a corresponding special technical feature.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1638

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
